

STUDENT HANDBOOK

Sample Educational Document for RAG Chatbot Testing

Institution: Greenfield Institute of Technology

Academic Year: 2026–2027

1. Welcome and Purpose

The Student Handbook provides general guidance for students on attendance, leave, conduct, campus facilities, communication, and student responsibilities. Students are expected to read the handbook and follow the procedures described in it.

The information in this sample handbook is fictional and is intended only for demonstrating document retrieval and question answering.

2. Attendance Policy

Students are expected to maintain a minimum overall attendance of 75% in each semester. Attendance is calculated using the number of classes attended divided by the number of classes conducted, multiplied by 100.

Students whose attendance falls below the required level may be required to submit an explanation and supporting documents to the department. Attendance shortage decisions are subject to the academic regulations of the institution.

3. Leave Policy

Students who need to be absent should obtain permission according to the department's leave procedure. Planned leave should normally be requested before the absence.

For an unexpected absence, the student should inform the class advisor or department office as soon as reasonably possible. Approval of leave does not automatically remove attendance requirements.

4. Student Conduct

Students are expected to behave respectfully toward faculty members, staff, visitors, and other students. Bullying, harassment, deliberate damage to institutional property, and disruptive behavior are prohibited.

Students must carry their valid institutional identity card when required on campus and should follow reasonable instructions issued by authorized faculty or staff.

5. Academic Integrity

Students must submit their own academic work unless collaboration is explicitly permitted. Plagiarism, unauthorized copying, fabrication of results, and impersonation are treated as academic misconduct.

When using external sources in academic work, students should acknowledge those sources using the format specified by the course or department.

6. Campus Facilities

The library is available for academic reading and reference. Students should return borrowed materials on time and maintain silence in designated reading areas.

Computer laboratories are intended for academic and approved institutional activities. Users should not install unauthorized software or change system configurations without permission.

7. Communication and Student Support

Official academic announcements may be communicated through the institutional learning platform, official email, department notices, or other approved channels.

Students who need academic support should first contact the relevant faculty member or class advisor. For administrative matters, students may contact the department office.

8. Student Responsibilities

Students are responsible for checking official announcements, attending scheduled classes, completing academic requirements on time, and maintaining respectful conduct.

Students should keep their institutional contact details updated so that important communications can reach them.
